

Shared Driveways

If you live on a shared driveway with one or more branches, you will need an additional sign at each branch of the road. This will allow our apparatus to find your home.

For more information on requirements for rural driveways, please refer to the Columbia County Fire Service Driveway Standards, available at our Administration Office or online at crfr.com/prevention

To order an address sign:

Please fill out the order form inside this brochure and mail or drop it off at our Administration Office

*If paying with a check, make payable to
Columbia River Fire & Rescue*

*If paying by credit card, please stop by

Columbia River Fire & Rescue

*Rural Address Sign
Program*

Rural Address Sign Program

What is the purpose of a rural address sign?

Every second counts when firefighters, medical personnel or law enforcement are responding to an emergency. Columbia River Fire & Rescue wants your home to be easily and quickly located in an emergency so that we may help you in your time of need.

Proper identification of your home may be the difference in saving or losing lives and/or property.

Our address signs are designed to be highly visible from the main road, day or night.

These signs are also beneficial to delivery and utility companies.

Size

The two-sided sign is a standard 6" x 12" marker with a reflective green background and 3" white reflective numbers.

Free Installation

Columbia River Fire & Rescue crews will happily install these signs at the beginning of your driveway and any branches you have, provided you reside within the service area boundaries of our fire/EMS district.
